European Journal of Operational Research 104 (1997) 622–624

EUROPEAN JOURNAL OF OPERATIONAL RESEARCH

Contents Volume 104

Invited Review

1 Forest management challenges for operational researchers
D.L. Martell, E.A. Gunn and A. Weintraub

Theory and Methodology

18 Monitoring pollution accidents
H.W. Gottinger
31 Relationships between the decision support system subspecialties and reference disciplines: An empirical investigation
S.B. Eom
46 The structure of qualitative decision-making
C.M. Brugha
63 The structure of adjustment decision-making
C.M. Brugha
77 The structure of development decision-making
C.M. Brugha
93 Heuristic concentration and Tabu search: A head to head comparison
K.E. Rosing, C.S. ReVelle, E. Rolland, D.A. Schilling and J.R. Current
100 Exact and heuristic algorithms for the uncapacitated multiple allocation p-hub median problem
A.T. Ernst and M. Krishnamoorthy
113 An empirical study of a new metaheuristic for the traveling salesman problem
S. Tsubakitani and J.R. Evans
129 New edges not used in shortest tours of TSP
K. Sakakibara
139 Minimum directed 1-subtree relaxation for score orienteering problem
S. Kataoka, T. Yamada and S. Morito
154 New algorithms for product positioning
P. Hansen, B. Jaumard, C. Meyer and J.-F. Thisse
175 Capacity planning for phased implementation of flexible manufacturing systems under budget restrictions
S.-K. Lim and Y.-D. Kim
187 A cyclic production problem: an application of max-algebra
W.M. Nawijn
201 The design of service systems with queueing time cost, workload capacities and backup service
A. Amiri
218 Diagnosis and treatment of congestion in central urban areas
P. Roberg and C.R. Abbess
231 A new Markovian description of the M/G/1 retrial queue
A. Rodrigo, M. Vázquez and G. Falin
241 Network-based formulations of the quadratic assignment problem
M.O. Ball, B.K. Kaku and A. Vakhutinsky
250 Minimal spanning trees with a constraint on the number of leaves
L.M. Fernandes and L. Gouveia

Erratum

262 Audit scheduling with overlapping activities and sequence dependent setup costs. *European Journal of Operational Research* 97 (1997) 22–33
B. Dodin and A.A. Elimam

Feature issue: Twelveth EURO Summer Institute: Locational Analysis

265 Editorial
J. Barceló
269 Some personal views on the current state and the future of Locational Analysis
P. Avella, S. Benati, L. Cánovas Martinez, K. Dalby, D. Di Girolamo, B. Dimitrijevic, G. Ghiani, I. Giannikos, N. Guttmann, T.H. Hultberg, J. Fliege, A. Marin, M. Munóz Márquez, M.M. Ndlaye, S. Nickel, P. Peeters, D. Pérez Brito, S. Policastro, F.A. Saldanha de Gama and P. Zidda
288 Efficiency in constrained continuous location
M. Ndiaye and C. Michelot
299 Some new algorithms for location problems on networks
P.H. Peeters
310 Coincidence conditions in multifacility location problems with positive and negative weights
J. Fliege
321 A multi-modal approach to the location of a rapid transit line
G. Bruno, G. Ghiani and G. Improta
333 A multiobjective programming model for locating treatment sites and routing hazardous wastes
L. Giannikos
343 Restricted center problems under polyhedral gauges
S. Nickel
358 The Weber problem with regional demand
E. Carrizosa, M. Muñoz-Márquez and J. Puerto
366 A new assignment rule to improve seed points algorithms for the continuous k-center problem
B. Pelegrin and L. Cánovas
375 The return plant location problem: Modelling and resolution
A. Marín and B. Pelegrín

Theory and Methodology

393 The behavior of extreme values in Germany's stock index futures: An application to intradaily margin setting
J.P. Broussard and G.G. Booth
403 A hierarchical decision support system for production planning (with case study)
L. Özdamar, M.A. Bozyel and S.I. Birbil
423 On the (R, s, Q) inventory model when demand is modelled as a compound Bernoulli process
F. Janssen, R. Heuts and T. de Kok
437 Manufacturer incentives to improve retail service levels
R. Ernst and S.G. Powell
451 Optimal television schedules in alternative competitive environments
C.M.L. Kelton and L.G. Schneider Stone
474 A framework for analysing decisions under risk
M. Danielson and L. Ekenberg
485 Comparing multicriteria methods in the context of environmental problems
P. Salminen, J. Hokkanen and R. Lahdelma
497 Reserve assemblage of critical areas: A zero-one programming approach
J.C. Williams and C.S. ReVelle
510 Design of a distributed fiber transport network with hubbing topology
M.-g. Yoon, Y.-h. Baek and D.-w. Tcha
521 A parallel implementation of the PROMETHEE method
L.C. Dias, J.P. Costa and J.N. Clímaco
532 Stochastic models and variable returns to scales in data envelopment analysis
S.X. Li

549 An experimental evaluation of the efficacy of four multi-objective linear programming algorithms
C.E. Downing and J.L. Ringuest
559 A model to optimize project resource allocation by construction of a balanced histogram
P.D. Konstantinidis
572 Solving a two-dimensional trim-loss problem with MILP
T. Westerlund, J. Isaksson and I. Harjunkoski
582 Cyclic and non-cyclic scheduling of 12 h shift nurses by network programming
H.H. Millar and M. Kiragu
593 The β-assignment problems
G.J. Chang and P.-H. Ho
601 An objective hyperplane search procedure for solving the general all-integer linear programming (ILP) problem
A. Joseph, S.I. Gass and N. Bryson
615 Symmetric duality for nonlinear programming problem involving η-bonvex functions
G. Devi
